PLEASE READ OUR TERMS AND CONDITIONS

If a part that you need is not on this list, please call – we may have it, as we are always forgetting to add items. We try to keep adding new parts.

We keep an unfortunately diminishing stock of rare and obsolete parts, and also good used items.

***N.B This list is intended only as a guide : all prices are current, but subject to change without notice. If there is an increase on the stated catalogue price we will try to inform you at the time of ordering, but please ask for confirmation of cost.***

Price increases are not always due to our desire to be very rich, but are more often due to unavoidable rises in manufacturing and transport costs.

For your convenience we have given prices without VAT ( first column) and with VAT @ 20% ( second column). VAT is not applicable outside the EU. Non-UK VAT-registered customers within the EU will be required to state their registration number.

We despatch parts by Royal Mail and FedEx Next Day.  
Most parcels will require a signature as proof of receipt.  
Overseas parcels are usually sent by Royal Mail Parcelforce International, Standard Fedex International or UPS.  
If you are overseas we will require a telephone number and e-mail address as well as the full postal address- most important.

We like to despatch parts as soon as possible after ordering, ideally on the same day. But as there are so few of us ( i.e. just one!) there may be delays. If you are kept waiting we do apologise in advance.

On the very rare occasion that a part proves to be faulty we will either replace or refund without question, providing we are notified within 7 days of your receipt of the part and the unsatisfactory part is returned. If you return a part for any other reason we reserve the right to exert a 20% handling charge, provided the part is received back in the same condition in which it was sent.

***\*\* Personal callers are very welcome, but please telephone first, in case of disappointment if we are not here, especially if you are coming from a distance.***

We accept payment by cash (sterlin, US\$ or euro ) and major debit and credit cards. (not American Express) We also welcome payment by bank transfer. We can no longer accept payment by cheque.

We are usually available to take your telephone calls at the following times:

Weekdays: Monday to Thursday  
8.30 a.m. to 4.30 p.m.

**\*\*\* BUT THE MOST RELIABLE WAY TO GET IN CONTACT IS BY E-MAIL \*\*\***

Friday: Closed

In emergency e-mail us. Or try a telephone call, but we may not answer.

Saturday:

8.30 a.m. to 12 noon

**Please note we rarely answer withheld telephone numbers**

***\* Sometimes we are unavoidably away for short periods during stated opening hours or are here, but unable to take calls; so if you do not get an answer either try again later or e-mail us on [lotuslist@yahoo.co.uk](mailto:lotuslist@yahoo.co.uk).***

## ***HISTORY***

For four decades Mick Miller had a love affair with the Lotus Elan. It started with his building of new kits in the 1960's, continued with repairs and servicing and gradually evolved into restoration, only ending with his early death in 2003. By this time he was acknowledged across the world as a leading expert of the marque, accompanied by a legendary reputation for attention to detail.

Although the restoration workshop closed when Mick died, the spare parts side of the business continues to flourish, supplying both individual car owners and other restoration firms. We are also still able to answer restoration queries and offer advice.

We try to keep in stock all service items for the Elan and Elan Plus Two, along with many trim and body parts. In keeping with Mick's philosophy, we aim to ensure that the quality is as high as possible.

Forty-five years after the cessation of Elan production, there are few original equipment items still available from the Lotus Factory, but if they are obtainable, we try to stock them. Other parts are sourced from alternative suppliers and many are specially made for us. We are constantly trying to source and remanufacture previously unobtainable parts.

### ***SUPERFLEX BUSHES***

These Superflex polyurethane bushes are much longer lasting than the current rubber bushes. They are intended for road, not track, use and therefore do not produce a significantly harder ride.

### UP-DATED PARTS

We tend to be of the Luddite persuasion and hate change for its own sake; we do like to see the Elan +2 s kept more or less as they left the Lotus Factory and cannot quite see the point of attempting a radical conversion of a classic into a modern car. Just buy a modern car.

But even we have to admit that sometimes an innovation comes along which is worth considering .Here are a few of such items.

*High -torque starter motor*, Luke Motorsport.

Vast improvement for starting ,especially for high compression.

*Electronic ignition system*, Aldon Ignitor

Hidden inside the distributor, thus keeping the look of originality.

*High quality rotor arm*

Great improvement on the current standard Lucas rotor arm

*Braided steel clutch hose*

This goes from master to slave cylinders, replacing both the rubber and rigid OE hoses

*Braided steel brake hose set*

These have zinc-plated steel end fittings, but we can supply them with stainless steel fittings at extra cost.

*Superflex polyurethane bushes* – see first page for individual costs

These are much more durable than rubber, without drastically changing the handling.

*C.V Joint driveshaft conversion*- smoother drive, more durable than rotoflex

*Halogen headlamp units*- these fit into the existing headlamp bowls and can be supplied with standard bulbs and also with xenon bulbs which are 50% brighter than the standard. We are informed that no changes are needed to existing wiring. Old-style sealed- beam units are now obsolete.

*Electric headlamp system*- not for the purist!

## PAINT COLOURS

While paint colour is a subjective choice, where possible use a genuine Lotus colour. The main ( but not all) colours used were:

LO3 Wedgewood Blue, LO4 Cirruc White, LO7 Lotus Yellow, L11 Regency Red, Carnival red, L12 Lagoon Blue, L16 Tawney metallic, L12 Pistachio Green, L23 Burnt Sand. Also used on the S130 was a Ford Purple Metallic and Renault light metallic green. The correct silver and gold flake for the two-tone S130 roofs is available from Metalflake Ltd.

### IN ADDITION.....

- Our carpets sets are cut as original and properly bound. We even supply a chart showing how to fit them. The black is fine, but present we cannot find an exact replacement for the later cream-coloured carpet: we like to send a sample of our (very nice) substitute for your approval.
- We also supply complete or part underfelt kits cut as original - we believe we are the only concern to do this.
- We have a good selection of the specialized nuts, bolts and washers etc. you may need to perfect your restoration
- As well as supplying parts we can supply details such as where to go for excellent powder-coating, re-chroming and bright-zinc plating. We can also give details of good trimmers, etc.

*A final note- We are always eager to help, but please use a bit of psychology. Do not call and ask for a very rare part, saying " we have tried everywhere else".. We will answer gracefully, but secretly we will be offended, especially if you have bought all the easy and big expensive parts elsewhere. We are happy to give endless time free to help with queries, but we and the cats do have to eat as well.*

*So..... If your really have tried everyone else first- DON'T TELL US !*

*Similarly, don't say that Joe Bloggs Lotus can beat our prices- if they can, then buy it from them, but DON'T TELL US; we decline to be warriors in a price war. Please accept that we are driven by quality as much as price. And like to not always compared to like*
