

## INTRODUCTION

This publication contains all assemblies and parts sold as spares; it enables one to determine with precision their Part Numbers and to identify them from the illustrations.

### Vehicle Chassis Number

The method of identifying a vehicle, whether Component-Built or Fully-Built, is by use of the Vehicle Chassis Number which is comprised of code numbers as shown below. The Vehicle Chassis Number will be found stamped on a plate which is fixed to the left-hand side of the engine bulkhead.

50/01234

'50' = Vehicle Type = Elan +2

'01234' = Chassis Number

As from January, 1970 vehicle identification will be in the following form:-

<u>7001.0001 A</u>	Both chassis and body numbers being the same.
<u>7001.</u>	Represents year and month of manufacture.
<u>0001</u>	Represents the unit (chassis) number.
<u>A</u>	Represents the model code.

### Chassis Change Points:

#### Part Numbers

All Part Numbers commence with the Vehicle Type Number which enables one to determine if the part is peculiar to the Elan + 2 or whether it was first used for some other Lotus 'road' vehicle, thus:-

50 = First used on Elan + 2  
26, 36, 45, 500 = First used on Elan  
46, 54, 65, 74, = First used on Europa
