1.

For four decades Mick Miller had a love affair with the Lotus Elan. It started with his building of new kits in the 1960's, continued with repairs and servicing and gradually evolved into restoration, only ending with his early death in 2003. By this time he was acknowledged across the world as a leading expert of the marque, accompanied by a legendary reputation for attention to detail.

Although the restoration workshop closed when Mick died, the spare parts side of the business continues to flourish, supplying both individual car owners and other restoration firms. We are still able to answer restoration queries and offer advice.

We try to keep in stock all service items for the Elan and the Elan Plus Two, along with many trim and body parts. In keeping with Mick's philosophy, we aim to ensure that the quality is as high as possible.

Nearly fifty years after the cessation of Elan production there are few original equipment items still available from the Lotus Factory, but if they are obtainable, we try to stock them. Other parts are sourced from alternative suppliers and many are specially made for us. We are constantly trying to source and remanufacture previously unobtainable parts.

TERMS & CONDITIONS

This list is intended as a guide: with the current perfect storm of Brexit, Covid and general global demands on, and shortages of, raw materials, prices may change without warning. For the convenience of UK customers prices are shown without (1st column) and with (2nd column) VAT at 20%.

Overseas customers will not be charged UK VAT, but will be responsible for any VAT/import duty/handling charges levied in their home countries.

We require a local telephone number and, if possible, an e-mail address with each order.

We like to despatch parts as soon as possible after taking an order: but as there are so few of us (i.e. just one!) occasional delays do occur. If you are kept waiting we apologise in advance.

On the very rare occasion that a part proves to be faulty we will either replace or refund without question, providing we are notified within 7 days of your receipt of the unsatisfactory part and that it is returned for our inspection.

If a part is returned for any other reason we will accept it providing it is returned in the condition in which it was sent: we reserve the right to exert a 20% handling charge.

We accept payment by cash, VISA, Mastercard and bank transfer (preferred). Sorry, no cheques.

OPEN: Monday to Thursday 9.00 a.m. to 4.30 p.m. CLOSED Friday to Sunday & Bank Holidays

*** THE ELUSIVE MRS MILLER ***

ALTHOUGH WE TRY TO ANSWER THE TELEPHONE IT IS OFTEN NOT POSSIBLE, SO THE MOST RELIABLE WAY TO GET IN TOUCH IS BY E-MAIL AS WE CHECK REGULARLY.
PERSONAL VISITS WELCOME, BUT BY PRIOR APPOINTMENT ONLY PLEASE. NO SOCIAL MEDIA.

SUPERFLEX BUSHES

These polyurethane bushes are much longer lasting than the current rubber bushes.
They are intended for road, not track, use and therefore do not produce a significantly harder ride.

NUTS, BOLTS, FASTENINGS, ETC.

Too numerous to mention- we keep most of what you might need in stock

MANUALS

Factory Workshop Manual	118 00
Factory Parts List (parts numbers mostly obsolete, but useful for exploded diagrams)	118.00

UP-DATED PARTS

We tend to be of the Luddite persuasion and dislike change for its own sake; we do like to see the Elan +2s kept more or less as they left the Lotus Factory and cannot quite see the point of attempting a radical conversion of a classic into a modern car. Just buy a modern car.

But even we have to admit that sometimes an innovation comes along which is worth considering . Here are a few of such items.

High –torque starter motor, Luke Motorsport.

Vast improvement for starting , especially for high compression.

Electronic ignition system, Aldon Ignitor

Hidden inside the distributor, thus keeping the look of originality.

High quality rotor arm

Great improvement on the current standard Lucas rotor arm

Braided steel clutch hose

This goes from master to slave cylinders, replacing both the rubber and rigid OE hoses

Braided steel brake hose set

These have zinc-plated steel end fittings, but we can supply them with stainless steel fittings at extra cost.

Superflex polyurethane bushes – see first page for individual costs

These are much more durable than rubber, without drastically changing the handling.

C.V Joint driveshaft conversion- smoother drive, more durable than rototflex

Halogen headlamp units- these fit into the existing headlamp bowls and can be supplied with standard bulbs and also with xenon bulbs which are 50% brighter than the standard. We are informed that no changes are needed to existing wiring. Old-style sealed- beam units are now obsolete.

Electric headlamp system- not for the purist!

16. PAINT COLOURS

While paint colour is a subjective choice, where possible use a genuine Lotus colour. The main (but not all) colours used were:

LO3 Wedgewood Blue, LO4 Cirruc White, LO7 Lotus Yellow, L11 Regency Red, Carnival red, L12 Lagoon Blue, L16 Tawney metallic, L12 Pistachio Green, L23 Burnt Sand. Also used on the S130 was a Ford Purple Metallic and Renault light metallic green. The correct silver and gold flake for the two-tone S130 roofs is available from Metalflake Ltd.

IN ADDITION.....

- Our carpets sets are cut as original and properly bound. We even supply a chart showing how to fit them. The black is fine, but present we cannot find an exact replacement for the later cream-coloured carpet: we like to send a sample of our (very nice) substitute for your approval.
- We have a good selection of the specialized nuts, bolts and washers etc. you may need to perfect your restoration
- As well as supplying parts we can provide details such as where to go for excellent powder-coating, re-chroming and bright-zinc plating. We can also give details of good trimmers, etc.

A final note- We are always eager to help, but please use a bit of psychology. Do not call and ask for a very rare part, saying "we have tried everywhere else".. We will answer gracefully, but secretly we will be offended, especially if you have bought all the easy and big expensive parts elsewhere. We are happy to give endless time free to help with queries, but we and the cats do have to eat as well!

So..... If you really have tried everyone else first- DON'T TELL US !

Similarly, don't say that Joe Bloggs Lotus can beat our prices- if they can, then buy it from them, but DON'T TELL US because we decline to be warriors in a price war.

Please accept that we are driven by quality as much as price. And like to not always compared to like:ours just might be better.
